

Pillars Of Essay, Writing Essay Paper, Upsc Mains Exam, Dr Khan, Ksg India

His part of discussion on around si I'm trying to explain for you the kind of mindset that you should develop with respect to four pillars on which you're going to rest your essay on this is something is this mental level that you have to keep in mind in fact you have to mentally visit these four points every time you write a fresh paragraph first thing that you should keep in mind is that what. I am writing on that's the topic it is very important that when you are writing an essay you should always remember that what is the topic.

I am writing on in fact that's where you have got an article an essay is different an article can deal with different facets of a particular team but then they can be independent paragraphs possible in an article in essay you cannot imagine a paragraph which has got such existence that doesn't in individually connect to the topic. it is very important that different different paragraphs that you have written they all are connected with each other and also independently connected with the topic that they have got which means they're dealing with some aspect of the title. always remember what. I am writing on is it connected with that or not unusually is simple trick.

I will tell you to keep in mind is that one of those five W's and one H get reflected in that particular paragraph like what where why when how who which. I mean any one of those questions of that title is being treated in a paragraph that we're dealing with that means it is not an article it's not a story it is actually an essay.

That's what something is very clear you should ask yourself what. I am writing on the first question who I'm writing it for that's the second question which to ask yourself every time you write a fresh paragraph and then I'll tell you the person is above my age of my age maybe. that means he's a person who's elderly your parents age. you have to be very careful about the age of the person. you should not write something which is what he can be offended that's what you remember Bob our age the second thing which.

I will tell you about his background is a person from literature he's not a person who belongs to your generation he doesn't know the word Dhru he doesn't know be upon W. I mean you have to be very careful with my generation and our English our English is probably learned about 30 years ago from somebody who learn 30 years ago. 60 year old English. that's the kind of thing.

I would like to see that you are keeping in mind that who you are writing for in the sense like you must not be at any stage trying to touch me on the wrong side learn now and that's something just to be kept in mind and then I'll tell you that the certain thing that my generation is touchy about and you should be careful about those four things one you should be careful about religion you should never mention anything about religion which is negative and can be offensive to somebody because you have no idea people are fairly touchy and the matters of religion also people are touching about reason they come from please ensure that you do [stanford essays](#) not write a negative about my tea any religion and then somebody may be affected offensively then the third thing is ideology if you have got certain ideology that. I have been living with that this is a good idea you can be political ideology it can be anything any ideology of Marx for that matter any anybody for that matter if.

I have been feeling that it's good and. I don't expect it to change it now. I can't change it because of you. I mean. I I think you have to be not too pushy about an ideology you have to be careful about that and people are also touchy about individuals. please ensure that this religion region individuals ideologies you should not be touching wrongly because who that you are writing for has to be borne in mind very very carefully why.

I am writing this essay you writing this essay only for one thing that is for Marx. never do anything of this which may just affect you. you're writing it for getting marks not pressing your logic like lots of times that you read essay in an article in a newspaper there quite often they have an ideology to push forth and then hence it is to be proved that kind of thing no it's not like that. people can get touchy about closed sentences the most important reason for this why you saying most important it will affect your purpose that you're getting marks one of the most important right open sentences don't write closed sentences don't in I'm writing my essay in what. I mean by tone you must ensure that your tone should go as if in a race that you have got like a tone can possibly vary from pessimist stone - let's say serious tone to somber tone to optimistic tone or two enthusiastic tone you cannot expect that one paragraph is enthusiastic another paragraph is pessimistic. if you have got some we're seniors the range can be pessimistic - somber serious somber or if you've got optimistic you can have this - this if you have got this tone then you have to keep in mind please remember this four points what.

I am writing on Who. I am writing for why. I am writing this and the toll in which. I am writing on I'm sure you're going to reach to the heart and mind of the reader much more effectively.
